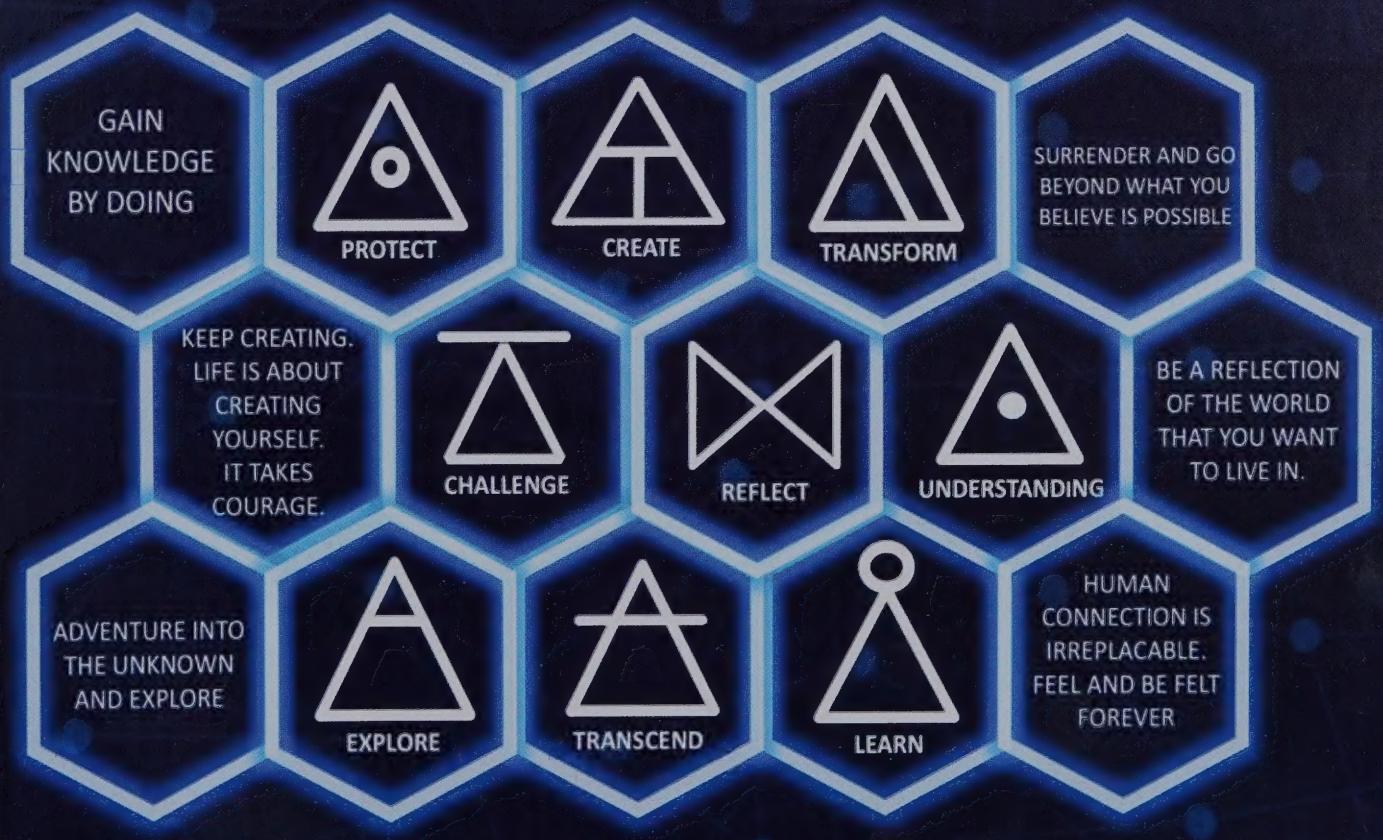
to our past *to our future*

Connected



Graduation is a time of tremendous change. The routine that has been followed for twelve years will look completely different and it is almost impossible to anticipate exactly what is yet to come. You are about to embark on an incredible transformation from being a "high school kid" to an adult, taking on the challenges and responsibilities that inevitably lie ahead. This is an amazing time for you and it is my hope that you feel prepared and ready to take flight.

This transformation you are about to experience reminds me of the life cycle of a butterfly. Ever since I was a little girl I have been fascinated with the beauty of the butterfly. Butterflies go through four stages of development to reach adulthood: the egg, caterpillar, pupa, and adult butterfly, kind of like people do. We are born as infants, grow into young children, evolve into adolescence, and then transform into adults. Each stage of our growth and development brings new and exciting experiences and changes, as does each stage of the cycle of the butterfly.

Butterflies are beautiful, as each one of you are. *You are unique and special; you are enough!* You already have inside of you all that you need to thrive in life. *Cultivate your gifts and talents.* Engage in personal and professional growth and development to explore who you are and what gifts you bring to this world. Butterflies are fragile, yet strong. They carry the power to change the wind patterns. *You are sensitive and strong; you are brave.* Have the courage to try, even when it is hard, and always give your best. Butterflies decorate our gardens with their beauty and bring joy to those who see them. *Be present and show up; show the world who you are - let people see the beauty you are both inside and out.*

It is my hope that your time at Barringer Arts positively contributed in some small way to prepare you for the transformation you are about to experience. Know we are very proud of you and you are now a special part of the Barringer legacy. Much love and happiness and remember to always follow your heart, as it will always lead you towards peace and optimal well-being.

To the Class of 2018

Graduation is a time to remember.

A time to look back and reach forward.

A time for letting go and a time for discovering hopes and dreams that are yet unborn.

A time to say goodbye to yesterday and a time to greet tomorrow with courage.

The time to look to the future and imagine the greatness you will achieve and the person you will become.

What was your Project?
What does your data tell you?
The PH remained the same and the GH in the expile water went up and once dead organisms were in there it balanced out.
General Hardness of Experimental vs. Control
pH of Experimental vs. Control
Hard water is good - the more ions, the harder the water. Our water was soft. The fish made it harder but when they died it went back down.
The control stayed the same and the PH of the experimental went down and became more acidic, the dead were why.
